Within this valuation income and yield figures are based on mid market prices and sourced from FT Interactive Data an external statistical agency and no reliance should be placed thereon - data is indicative only. Holdings where the original purchase prices are unknown are not included in the Book Cost. From a taxation standpoint Book Cost of holdings should be verified and should not be relied upon.

Kindly note that income and yield data is shown gross and where appropriate includes Tax Credit which is not recoverable within a PEP/ISA under current regulations.

Investment Trusts: Investment in small market capital securities can cause volatile movements in the share price. Movements in the price of investment companies might be more volatile than movements in the price of the underlying securities. Before investing in Investment Trusts it is important for clients to assess the level of risk attributable to a particular fund which can be significantly higher when a Trust is capable of extending gearing of the fund. This is especially the case for Split Level Trusts where the Capital shares may fall behind the Income and Zero Dividend shares in terms of repayment priority. Investors are strongly advised to consult with their Advisor to discuss risk levels and whether the particular Investment Trust is suitable for their financial circumstances.

This valuation should not be relied upon as providing an investor with proof of holding. Clients should confirm the accuracy of their holdings at the time of giving dealing instructions by either, consulting their own records in the case of certificated holdings, or confirming their entitlement with their WCSB contact where investments are held under our custody.

Your investment aim and risk appetite are shown above. If you feel they have changed, please let us know as soon as possible.

Within this valuation income and yield figures are based on mid market prices and sourced from FT Interactive Data an external statistical agency and no reliance should be placed thereon - data is indicative only. Holdings where the original purchase prices are unknown are not included in the Book Cost. From a taxation standpoint Book Cost of holdings should be verified and should not be relied upon.

Kindly note that income and yield data is shown gross and where appropriate includes Tax Credit which is not recoverable within a PEP/ISA under current regulations.

Investment Trusts: Investment in small market capital securities can cause volatile movements in the share price. Movements in the price of investment companies might be more volatile than movements in the price of the underlying securities. Before investing in Investment Trusts it is important for clients to assess the level of risk attributable to a particular fund which can be significantly higher when a Trust is capable of extending gearing of the fund. This is especially the case for Split Level Trusts where the Capital shares may fall behind the Income and Zero Dividend shares in terms of repayment priority. Investors are strongly advised to consult with their Advisor to discuss risk levels and whether the particular Investment Trust is suitable for their financial circumstances.

This valuation should not be relied upon as providing an investor with proof of holding. Clients should confirm the accuracy of their holdings at the time of giving dealing instructions by either, consulting their own records in the case of certificated holdings, or confirming their entitlement with their WCSB contact where investments are held under our custody.

Your investment aim and risk appetite are shown above. If you feel they have changed, please let us know as soon as possible.
