How interest is charged

We calculate interest daily based on the total amount you owe. We add together all the daily interest amounts in each statement period and add the total to your balance on your statement date. The sooner you make your payments, even before the payment due date, the less interest you will pay. There are some exceptions to these interest rules. Details are available within your terms and conditions.

Estimated interest

This is an estimate of the interest you'll have to pay next month. It assumes:

- you pay only the minimum due
- you pay by the due date
- you have no more transactions before your next statement
- you don't change your statement date
- your standard interest rates and the way we calculate interest don't change

The estimate does not include reduced interest if a promotional rate starts before your next statement is produced.

Important Information about Promotional Offers

You will lose any promotional offers if your minimum payment is late or you go over your credit limit. The standard rate will apply on the remaining balance.

SUMMARY BOX

The information contained in this table summarises the key product features not displayed elsewhere on the statement and is not intended to replace any terms and conditions.

Interest-free period	Maximum 56 days for purchases if you pay the full balance shown on your previous and current statement on time. No interest-free period on balance transfers and money transfers (if available) and cash transactions.
Interest charging information	You will not pay interest on new purchases if you pay the full balance shown on your previous and current statement on time. Otherwise, the period over which interest is charged is as follows: Purchases, Cash Transactions, Balance Transfers and Money Transfers (if available): From the date the item is debited to your account until the balance is paid in full.
Allocation of payments	We use your payments to pay off balances charged at the highest interest rate first and so on down to balances with the lowest interest rates. If there is more than one type of balance at the same interest rate, they are paid off in the following order: cash transactions, purchases, balances transfers and money transfers (if available) and then default charges (plus any interest or charges incurred as a result of those balances). For each type of balance, your payments will pay off the oldest balance (and related fees, charges or insurance) first.
Minimum repayment	Your monthly minimum payment will be an amount equal to the higher of £5 or the total of any interest charged, any default charges payable, 1/12th of your annual fee (if applicable), and 1% of the balance you owe shown in your statement. If you owe less than £5 you must pay the full amount you owe.
