1. Introduction

I am pleased to enclose our annual trustee report for your scheme.

We have prepared benefit statement and can of course tailor this according to your needs and planning requirements.

We have now launched a new online platform, which is intended to help you get value for money, and build retirement capital via Fintech. This is the first of it's kind for the UK market for SSAS clients and it has taken us a number of years to develop. We hope that this will be of benefit to you. You can of course opt out of this online service, and keep everything as it is. I will contact you separately on this following this report.

I would also like to thank you for choosing us to act as the Practitioner for your pension scheme.

2. Fund Composition

The scheme income as a percentage of scheme assets for the period was 6.00% rounded

3. Scheme Tax Return and Reporting

Below is a copy of our tax report submission for the period ending 5 April 2018 and our supporting comments.

The scheme reporting is one of the most important aspects of scheme management as the data submitted may be reviewed by an Inspector in connection with scheme fund movements. It is particularly important that where transactions are undertaken which may involve the scheme connected to persons or businesses associated with either the scheme members or the employer that we report that information in the correct format.

It is important that clients notify us in advance of any transactions involving either a scheme member, a close connected company or someone connected to a scheme member, such as a relative or business partner.

The following data has been submitted

4. Online Platform

We have developed a new online platform for you. This will allow you to manage your SSAS. We have called this platform, Retirement Capital. Each member of the scheme will be able to login and access their own account and fund share via our new platform aptly named: retirement.capital. You will have your own login and password, each share of fund will be held.

We are launching the platform in two phases.

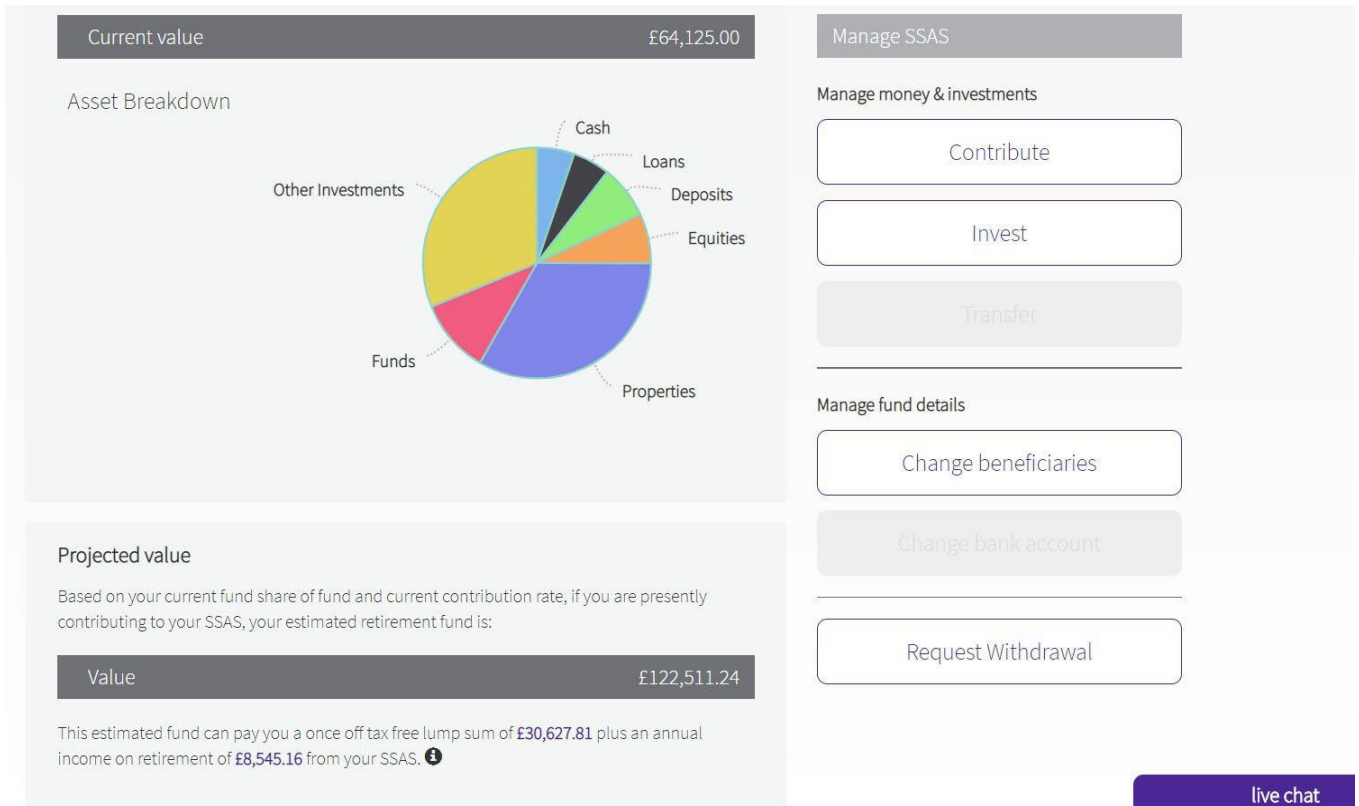

Phase 1 is available now and it will provide you with helpful information including:

1. Contribute (your available annual allowance will automatically be updated)
2. Take pension benefits – you can set up pension and lump sum instructions via your dashboard.
3. Invest into your business – this can be set up as a pension scheme loan.
4. Secure the best deposit rates for your SSAS – the latest rates of deposit accounts are available.
5. View and change your beneficiaries
6. See an immediate forecast of your benefits, with lump sum and pension income.
7. A nice pie chart of your holdings
8. Immediate cash value of your pension account (for AIB accounts)
9. Valuation of other assets
10. Online support and live chat
11. Tax reporting and scheme management

Phase 2 will build on these key functionalities and will include online bank instructions to us, property management functionality, online document and statement storage, investment management development through a single dashboard. We will also build on a retirement and phased income calculation tools.

Phase 2 will be ready in the first quarter of 2019. Integrated share trading and dealing will be delivered in the third and final phase.

Certain investments can be integrated onto your dashboard, this includes funds managed by your financial advisor which offer an API feed. Below is a snap shot of how your account could look:

Your investments are broken down with online functionality that will appear like this. The tabs allow you to undertake certain instructions.

5. Pension Income statement

Assumptions used in calculation

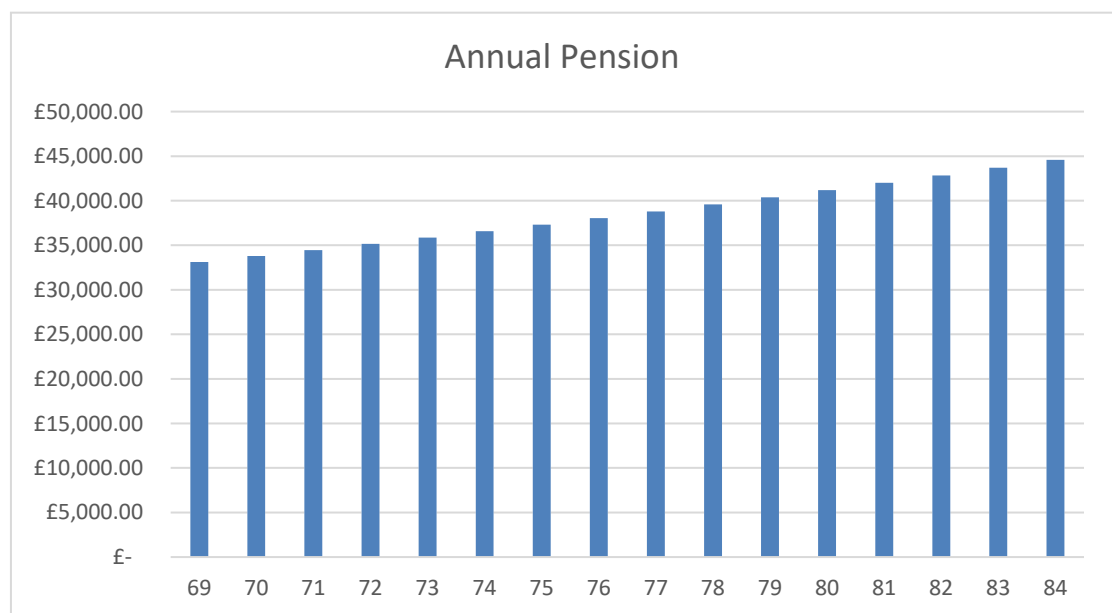

Annual pension increases matched with inflation 2.00%

Average annual rate of investment income net of expenses 4.00%

Crystallised Pension Fund £812,577

Gross pension paid for tax year £34,000

The pension scheme can support continued pension increases at a minimum level of CPI. This is represented by the following pension increase chart, age of member is at the bottom and pension amount stated on the left column.

This will have the following effect on the fund if pensions are paid at this rate with investment income and growth at the assumption rates stated.

If you require an alternative illustration please let us know. This functionality will be available through your online retirement income dashboard in 2019.

6. Data Protection Act Changes

The General Data Protection Regulation (GDPR) is a regulation intended to strengthen and unify data protection for all individuals within the European Union. It was effective on 25 May 2018 and replaces the data protection act. It is the biggest shake up in generations to data use, privacy and business impact. It covers anyone who is engaged in data use and storage.

Small self administered schemes have a unique relationship in that the members and trustees are connected. Your scheme will be affected by GDPR, however I do not recommend changes at this time given that the members are connected and the scheme is therefore low risk. For your reference personal data is defined as:

'Personal Data' means any information relating to an identified or identifiable natural person ('data subject'); an identifiable natural person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person. It is all encompassing.
