your energy information, download
the First Utility app on iOS & Android

Your annual Gas summary for 21 July 2016 - 20 July 2017

Welcome to your annual summary. Here you will find all the information you need to stay in control of your energy costs by understanding how much gas you have used in the last 12 months and what it has cost you. You can use this to compare your tariff to others available. Don't forget to keep a copy for your records.

Your Gas usage summary

You consumed
19,654 kWh (kilowatt hours)
Calculations include estimated readings.

Your total costs were
£655

If you use the same amount of energy over the next 12 months and remain on your current tariff, we estimate your costs will be £661*

Could you pay less?

Your gas Personal Projection is £661 per year*

This is your estimated energy spend for your current tariff assuming you use the same amount of energy as you did last year. It includes any discounts and charges like VAT. If your tariff ends soon this projection assumes you move to our variable tariff.

Our cheapest tariff for you

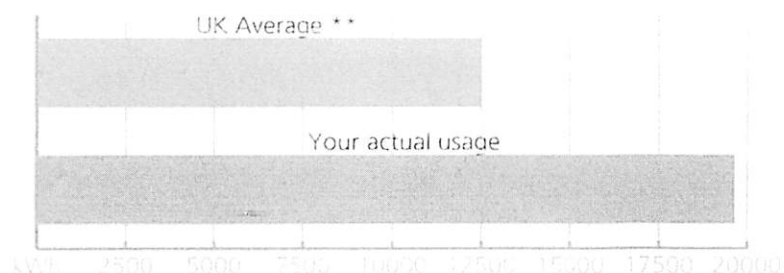

First Magic July 2018 Online Direct Debit ebill - over the next 12 months you could save £107 on your combined gas and electricity costs.†

All tariffs are subject to availability. For more information on your tariff and switching, see overleaf.

Please note that switching tariffs may involve

1. a one-off start-up fee on different terms and conditions and, 2. a one-off exit fee from your current tariff.

Remember - it might be worth
thinking about switching your
tariff or supplier.

* based on your current tariff including any discounts and charges like VAT. If the price of your tariff changes, you change tariff, or the amount of energy you use changes, this forecast will change too.

† If your tariff ends within the next 12 months we have assumed that you will move onto our cheapest variable tariff.

** based on Ofgem typical medium consumption figures.

† you may be charged £30 per fuel if you cancel more than 49 days before your current tariff ends.
