Notes

1. Distribution or asset rebate before tax deducted or tax credit applied.
2. Equalisation is an untaxed portion of a distribution (deemed to be a return of capital). This will only apply to the first distribution/account period after you have invested. (Additional investments will attract further equalisation).
3. The amount of the gross distribution less any equalisation. This will attract a tax deduction or tax credit.
4. The tax credit accompanying a dividend distribution. (The tax credit cannot be reclaimed but can be used to offset a higher rate tax liability).
5. The tax deducted from an interest distribution or asset rebate at source by the investment manager.
6. Amount paid (or reinvested for accumulation distributions) after tax.
7. Please note in exceptional circumstances some distributions or asset rebates may not have been advised by the investment manager at the time of issuing this tax voucher.
